Members of the club furnish free tutoring in mathematics for those who need it, on two specified days each week. Much assistance is given to the operation of the Math League which involves student participants representing approximately twenty high schools from a wide area. This includes proctoring and grading tests, as well as serving food at a fall and a spring get-together. In fact, the spring affair is in the nature of an indoor picnic and awards meeting for which the food is also paid by the math club. If time, money, and enthusiasm are sufficient, members take a trip each spring to some point or points of interest. Places visited include the Conoco Research Center at Ponca City, Oklahoma, and the Parabolic Arch, which symbolizes and identifies St. Louis, Missouri.

## *The Image Makers*

These two pages before you are given to you, the student. We (the staff) felt that the least we could do by way of recompense, and in praise of your selfless and untiring efforts, would be to immortalize forever, on "celluloid," the saga of your struggle.

You dedicated yourselves to making this school a more fulfilling experience. You devoted all your time and energy to supporting the campus-sponsored activities, so we definitely feel that your efforts will have a wonderful effect upon everyone who attended this school.

You have truly set a "matchless" example.

It would be impossible to list everyone who contributed to the wonderful atmosphere which pervades this campus, but we wish to give special thanks to those perennial pool

sharks who gladdened our hearts time and again by breaking the dull routine of putting a yearbook together. How much we came to love the steady thump, thump, thump which heralded the beginning of a new game and the sharp crack which announced a solid break. And who could forget the colorful language of a pool hall! The quality of our copy was improved considerably by the spicy expostulations saturating the smoke-filled air of the Union. Though nothing could improve the quality of our pictures, we are eternally grateful to Mr. Murray and the members of the Chart Staff. They, at least, made an effort to supply us with nearly professional pictures. So students, we thank and praise you for your ceaseless support of your yearbook.

"... No man is an island, entire of itself; every man is a piece of the continent, a part of the main; if a clod be washed away by the sea, Europe is the less, as well as if a promontory were, as well as if a manor of thy friends of thine own were; any man's death diminishes me because I am involved in mankind; And therefore never send to know for whom the bell tolls; It tolls for thee..."
